

Project Announcement

1. We only allow each team to be with **5-6** team members. The team leader can send an email to our TA (Miss. Tong LU) at tluaao@connect.ust.hk. If you cannot form a group, please also let us know as soon as possible.
2. Please propose your own topic related to Engineering Economy and submit a one-page proposal. You are also welcome to schedule a short meeting with me to discuss your proposal (either zoom or face-to-face).
3. Each team needs to give a presentation on the project. The presentation lasts for 13 minutes (10 minutes presentation + 3 minutes Q&A). EACH team member needs to present during the presentation.
4. Important dates:
 - a. Teaming: **29 Sep 2023** (Friday)---you are expected to send email to TA to declare your team members.
 - b. Proposal submission: **30 Oct 2023**.
 - c. Project slides submission: **19 Nov 2023**.
 - d. Project Presentation: **20, 24 & 27 Nov 2023**.
 - e. Peer evaluation form submission: **30 Nov 2023**.

Project Description

Objective:

The main goal of the project is to learn more about engineering economics and accounting or to use the tools you have learnt in class to solve practical problems. You can extend the content on engineering economics and accounting and introduce new related topics. You can also study a specific management practice in a real organization. Please use the knowledge you learnt in class to identify and exploit opportunities for improvement in your chosen example.

Possible Structure for Presentation:

In the project, you are expected to perform the following:

- Understand problem/issue. Give a brief introduction of your problem, the objective you want to achieve. List all possible alternatives.
- Alternative analysis. Assess the strengths and weaknesses of each alternative by using the methodology discussed in class.
- Conclusion: Based on your calculation, give suggestions and draw conclusions on the problem in hand.

Project Evaluation

1. Presentations: ~ 13 minutes per team. EACH team member needs to present during the presentation.
2. The evaluation will be done by the entire class (30%) and the instructor (70%).

	8-10	5-7	3-4	1-2
Problem identification	Well defined and explained; a large amount of original thought;	Well defined and explained; some original thought;	Interesting problem identified, but there is little evidence of original thinking	It is not clear what the real problem is
Model and Data	Appropriate and rigorous model but yet not overly complicated; Excellent plan for data collection	Appropriate and rigorous model, but some fine-tuning is required; Some good ideas of how data can be collected	Appropriate model, but major adjustment is required; Little idea of how data can be collected	Inappropriate model, and/or major errors in the model; No idea on how data can be collected
Implementation Planning	Concrete and comprehensive plans; show considerations for all key issues; specific on how to measure the benefit	Good and realistic plan for data collection and improvement implementation	There are some good points in the plan, but the plan is either too vague or some ideas are unrealistic	No or little clue about what data is needed and how the improvement should be implemented; Or plans are unrealistic and illogical
Delivery	Excellent use of visuals; very clear and concise flow of ideas; demonstrate and stimulate passion	Good use of visuals; clear flow of ideas; demonstrate interest	Limited and/or not so good use of visuals; ideas presented but focus is lost at times; limited evidence of interest	No use of visuals; hard to follow ideas; lack of enthusiasm and interest
Response to questions	Excellent response; demonstrate in-depth consideration of all issues	Good response; demonstrate in-depth considerations of most issues	Satisfactory response; demonstrate considerations of some of the issues	Limited response; demonstrate a lack of considerations of significant issues
